Open to Remote, Relocate, Hybrid, Travel, On-Site

SUMMARY

MSc Data Science candidate with hands-on experience in predictive modelling machine learning and data driven decision making . Skilled in Python , SQL, R and statistical analysis with experience in building classification and time series models. Strong foundation in EDA, feature engineering and model evaluation using Scikit-learn and PyTorch

EXPERIENCE

Vodafone Idea Foundation (VOIS)

Oct 2025

Data Analytics Intern – AI & Large Language Models (LLMS) , India, Remote

- Data analysis case study on science and technology domain, analysis a dataset and write a report with insights, using LLM for assistance
- Analyzed multiple datasets at Vodafone Idea Foundation using AI/ML to generate insights and develop strong skills in data processing, feature engineering, and modeling

EDUCATION

University Of Leicester , United Kingdom – Msc in Data Science

Sep 2025

Indian Institute of Information Technology, Kalyani, India - B.Tech, Electronics and Communication Engineering - GPA: 7.40

Sep 2021

Sri Chaitanya Junior Kalasala, Hyderabad, India - High School, MPC - GPA: 9.34

Jun 2019

CERTIFICATIONS

Deloitte Australia Data Analytics Job Simulation on Forage

Jul 2025

- Completed a Deloitte job simulation involving data analysis and forensic technology,
- Created a data dashboard using Tableau, Transformed Excel to classify data and draw business conclusions

Tata Group Data Analytics Job Simulation on Forage

Sep 2025

- Completed a job simulation involving AI-powered data analytics and strategy development for the Financial Services team at Tata IQ
- Conducted exploratory data analysis (EDA) using GenAI tools to assess data quality, identify risk indicators, and structure insights for predictive modelling
- Proposed and justified an initial no-code predictive modelling framework to assess customer delinquency risk, leveraging GenAI for structured model logic and evaluation criteria
- Designed an AI-driven collections strategy leveraging agentic AI and automation, incorporating ethical AI principles, regulatory compliance, and scalable implementation frameworks

PROJECTS

Breast Cancer Prediction using Machine Learning (Python, Scikit-learn, Tensorflow) [Link](#)

Jul 2023

- Led the team of 3 to evaluate classification models (Logistic Regression, Random Forest) for breast cancer prediction
- Performed feature engineering and hyperparameter tuning, improving model accuracy to **96%**

Data-Driven Traffic Prediction using Machine Learning and Artificial Intelligence [Link](#)

Jul 2024

- Hands-on experience in analyzing and processing data for improved system performance and evaluate the prediction with LSTM , MLP ,GRU Models
- Implemented train-test split and model validation to prevent overfitting and reduced RMSE By **15%**
- Performed feature engineering and hyperparameter tuning, improving model accuracy to **89%**

Research on Communication Barriers in MSMEs (Textile non-Woven Industries)

- Led and coordinated a 5-member team to investigate communication barriers in MSMEs, driving project direction and task execution
- Developed and distributed 72 surveys across channels, collecting insights from industry professionals

SKILLS

Mathematics and Statistics

: Linear Algebra, Probability and Statistics, Calculus and Differential Equations, Statistical Signal Processing, Statistical Tools

Programming Languages

: Python (Pandas, Numpy, TensorFlow, PyTorch, scikit learn) , PySpark, C language R (Tidyverse, ggplot2, Fda), SQL

Machine Learning

: Regression, Classification, Data Modelling, Neural Network , Time Series Forecasting, Deep Learning (CNN , MLP, LSTM), NLP

Data Analysis & Tools

: Power BI, Excel, Power Point, MS-DOS, Tableau, Data Cleaning, Data Wrangling, EDA, Git
